

Export Compliance Specialist

Job Description

Johns Hopkins University Applied Physics Laboratory is seeking an experienced Export Compliance Specialist. The successful candidate will work closely with the Office of Counsel and other business functions in the organization to analyze business opportunities, propose export compliance solutions, and when appropriate obtain export authorization to ensure the ability to release technical data and services. She/he will research, prepare, and communicate the status of export license applications, Technical Assistance Agreements (TAAs), and other export and import documentation, and work with business units to proactively develop export compliance strategies for programs with international interactions.

Required Experience:

Bachelors degree or equivalent experience; minimum 3 years professional experience, at least 2 years of which include a broad background and depth in export/import regulations (ITAR, EAR, OFAC, ATF, Customs), compliance, classifications, licensing and exemptions, Technical Assistance Agreements, commodity jurisdiction requests, and Technology Control Plans; demonstrated ability to make independent judgments regarding the application of US Export Regulations; ability to apply professional perspective to APL's technology context and to technology issues; demonstrated ability to work independently with general guidance and as a team player; strong research, written and verbal communication skills; strong organizational skills and ability to establish priorities among a wide variety of projects; sound judgment, professional demeanor, good work ethic and business acumen. Applicants selected will be subject to a Government security investigation and must meet the eligibility requirements for access to classified information. Eligibility requirements include US citizenship.
